SUMMARY

Computer Science Engineering undergraduate with hands-on internship experience in Data Science, Agentic AI, Python, and Web Development. Worked on real-world data analysis and machine learning projects using Python libraries, and designed agent-based automation workflows using n8n. Actively seeking opportunities as a Data Science / AI / Python Intern to apply skills and continue learning through practical problem-solving.

TECHNICAL SKILLS

- Programming: Python, C, SQL
- Data Science & ML: Pandas, NumPy, Matplotlib, Scikit-learn, EDA, Feature Engineering
- Web Technologies: HTML, CSS, JavaScript, react.js
- Automation & AI: n8n, Workflow Automation, Agentic AI (Basics), API Integration, Vector embeddings(basics)
- Tools & Concepts: Node.js (Basics), Data Preprocessing, Model Evaluation

EXPERIENCE

Agentic AI Intern | Lawazia Tech

(July 2025-Aug 2025)

- Designed and implemented agent-based automation workflows using n8n
- Built multi-step workflows with conditional logic, triggers, and task orchestration
- Gained hands-on exposure to agentic AI concepts, workflow automation, and system-level thinking

Data Science Intern | Internship Studio

(Mar 2025-July 2025)

- Worked on data preprocessing, cleaning, and exploratory data analysis (EDA) using Python
- Built and analyzed data-driven projects applying Pandas, NumPy, and Matplotlib
- Trained and evaluated machine learning models to compare performance
- Derived insights from datasets to understand patterns and influencing factors

Web Development Intern | Ardent Computech Pvt. Ltd.

(July 2024-July 2024)

- Developed responsive web pages using HTML, CSS, and JavaScript
- Implemented interactive UI elements and basic cart functionality
- Gained exposure to Node.js and real-world web development practices

Python Intern | CodSoft

(Mar 2025-Apr 2025)

- Developed multiple Python mini-projects focusing on logic building and modular coding
- Strengthened core Python concepts including loops, functions, and modules

PROJECTS

COVID-19 Data Analysis

- Cleaned and preprocessed real-world COVID-19 datasets to ensure data quality
- Performed exploratory data analysis (EDA) to identify trends and patterns
- Applied feature engineering to improve analytical insights
- Created visualizations to effectively communicate findings
- Compiled a structured report summarizing key observations

Loan Dataset Analysis (Machine Learning)

- Preprocessed and feature-engineered loan datasets for machine learning tasks
- Implemented regression models to predict loan-related outcomes
- Trained and evaluated multiple models to identify the best-performing approach
- Analyzed feature importance to understand factors influencing loan approvals and defaults

Ice-Cream Booking Web Application

- Designed and developed a responsive booking website using HTML, CSS, and JavaScript
- Implemented dynamic cart functionality allowing users to add multiple items
- Focused on user-friendly UI and smooth navigation

EDUCATION

Bachelor of Technology – Computer Science & Engineering | Dumka Engineering College

(Sep 2023 – Present)

Senior Secondary (Science) – 90% | DAV Public School, Jamtara

(2023)

Secondary – 91% | DAV Public School, Jamtara

(2021)

CERTIFICATIONS

- API Fundamentals Student Expert – Postman (Aug 2025)- REST APIs, CRUD Operations, API Requests, Postman
- NEC '24 Basic Track (Participation) – E-Cell, IIT Bombay
- Content Contribution & Editor – Magazine 'ELEKTRICWEB'
- Languages: English, Hindi
